Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).
Required fields are marked with an asterisk (*).

1 General

Owner *  Repository name *

 Ecooocommerce_docker_backend is available.

Great repository names are short and memorable. How about [glowing-octo-spoon](#)?

Description

0 / 350 characters

2 Configuration

Choose visibility *  Public

Choose who can see and commit to this repository

Add README  Off

READMEs can be used as longer descriptions. [About READMEs](#)

Add .gitignore  No .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

Add license  No license

Licenses explain how others can use your code. [About licenses](#)
